PATH OF KNOWLEDGE

SOUTHERN BRANCH
OF THE NATIONAL CENTRAL LIBRARY

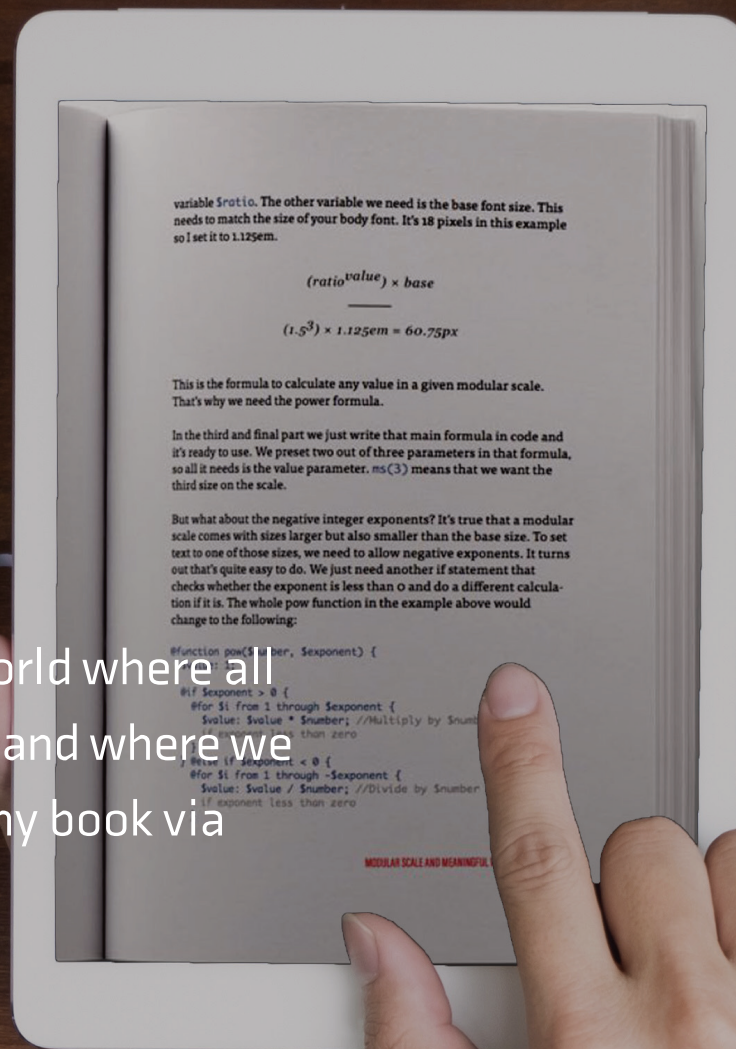

書山 - 國家圖書館南部分館暨典藏中心

1 CONCEPT

the path of knowledge

WHY

do we still go to a Library in a world where all culture can be stored on an Ipad and where we can have immediate access to any book via Amazon?

variable `$ratio`. The other variable we need is the base font size. This needs to match the size of your body font. It's 18 pixels in this example so I set it to 1.125em.

$$\frac{(\text{ratio}^{\text{value}}) \times \text{base}}{(1.5^3) \times 1.125\text{em} = 60.75\text{px}}$$

This is the formula to calculate any value in a given modular scale. That's why we need the power formula.

In the third and final part we just write that main formula in code and it's ready to use. We preset two out of three parameters in that formula, so all it needs is the value parameter. `ms(3)` means that we want the third size on the scale.

But what about the negative integer exponents? It's true that a modular scale comes with sizes larger but also smaller than the base size. To set text to one of those sizes, we need to allow negative exponents. It turns out that's quite easy to do. We just need another if statement that checks whether the exponent is less than 0 and do a different calculation if it is. The whole `pow` function in the example above would change to the following:

```
#function pow($number, $exponent) {  
  $value: 1;  
  #if $exponent > 0 {  
    #for $i from 1 through $exponent {  
      $value: $value * $number; //Multiply by $number  
      //exponent is less than zero  
    }  
  }  
  #if $exponent < 0 {  
    #for $i from 1 through -$exponent {  
      $value: $value / $number; //Divide by $number  
      //exponent less than zero  
    }  
  }  
}
```

MODULAR SCALE AND MEANINGFUL

THE GREEK GYMNASIUM

a place where people could learn and share
their knowledge in contact with nature

/

FROM THE GYMNASIUM TO THE GARDEN OF KNOWLEDGE CONCEPT

THE PATH OF KNOWLEDGE

Pushing the generation of a contemporary Gymnasium where people, nature and culture are connected, by fostering new connections between people + books, people + people, people + nature.

THE LIBRARY OF SERENDIPITY

Fostering the pleasure of discovering something you are not searching for, simply by browsing through books on the shelves. What if the library becomes a space where you can discover things you would never discover elsewhere?

// HOW CAN WE FOSTER THE SERENDIPITY? PROGRAM

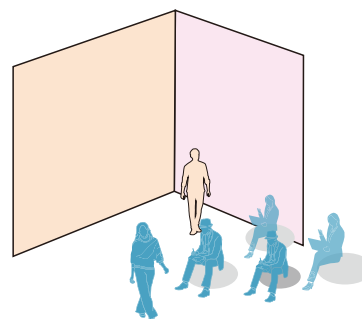

THE LIBRARY OF SERENDIPITY

The archiving strategy will explore how the arrangement of books and activities becomes a way to facilitate unexpected connections

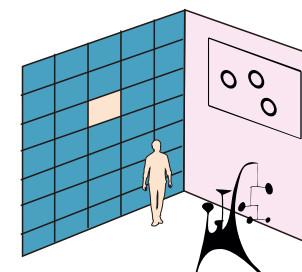

BOOK ARCHIVING FOSTERING SERENDIPITY

The archiving strategy could include alternative systems for organizing the books in the shelves: data can help in defining new kinds of connections between topics and authors. While users look for their chosen book or browse the shelves, they have the possibility of discovering something interesting and unexpected.

MIXED PROGRAM ACTIVITIES & BOOKS ARCHIVING

While searching for a book, users might stumble upon talks and small events organised in different thematic areas. This will help to facilitate cultural cross-pollination and a sharing of interests, while fostering the creation of a vibrant community of library users.

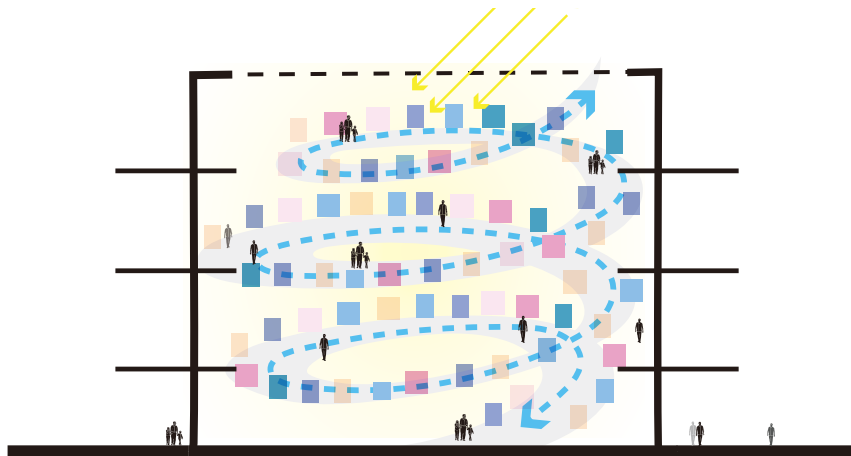

CURATION OF ART & BOOKS ARCHIVING

Some areas of the Library can be curated by different artists or researchers, in a rotating program. While users are looking for a book, they unexpectedly become visitors of an art exhibition.

in the lobby

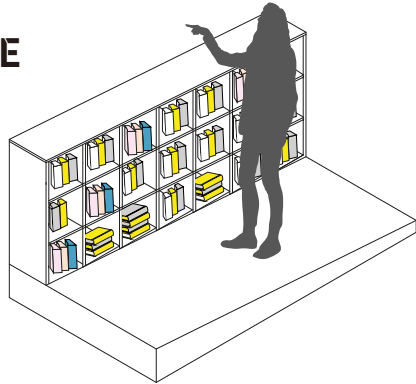

THE PATH OF KNOWLEDGE IN THE LOBBY CONCEPT

A COMPLETELY ACCESSIBLE, INTERACTIVE PATH OF KNOWLEDGE CONNECTS ALL THE FLOORS, WHILE CREATING NEW CONNECTIONS BETWEEN PEOPLE+BOOKS / PEOPLE + PEOPLE / PEOPLE + NATURE

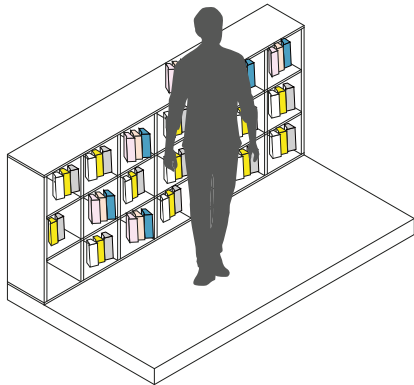

2.1

THE PATH OF KNOWLEDGE IN THE LOBBY TAXONOMY

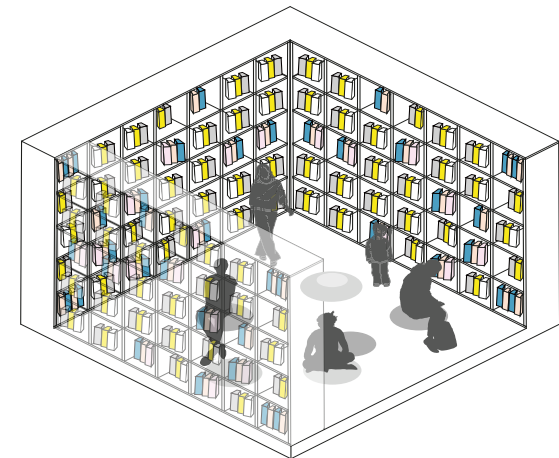

RAMPS

Forming a continuous ribbon connecting every level of the Atrium. The ramps are flanked by a curated ribbon of shelving highlighting recommended titles as the user passes by.

LANDINGS

Spaces to pause with integrated seating and reading areas. The landings provide moments to rest and orientate along the route.

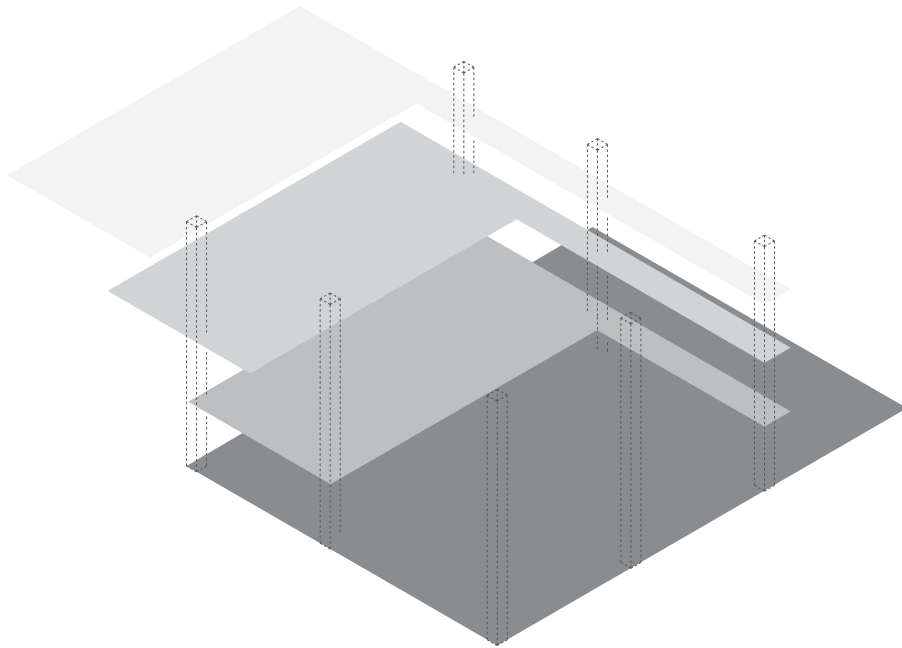

ROOMS

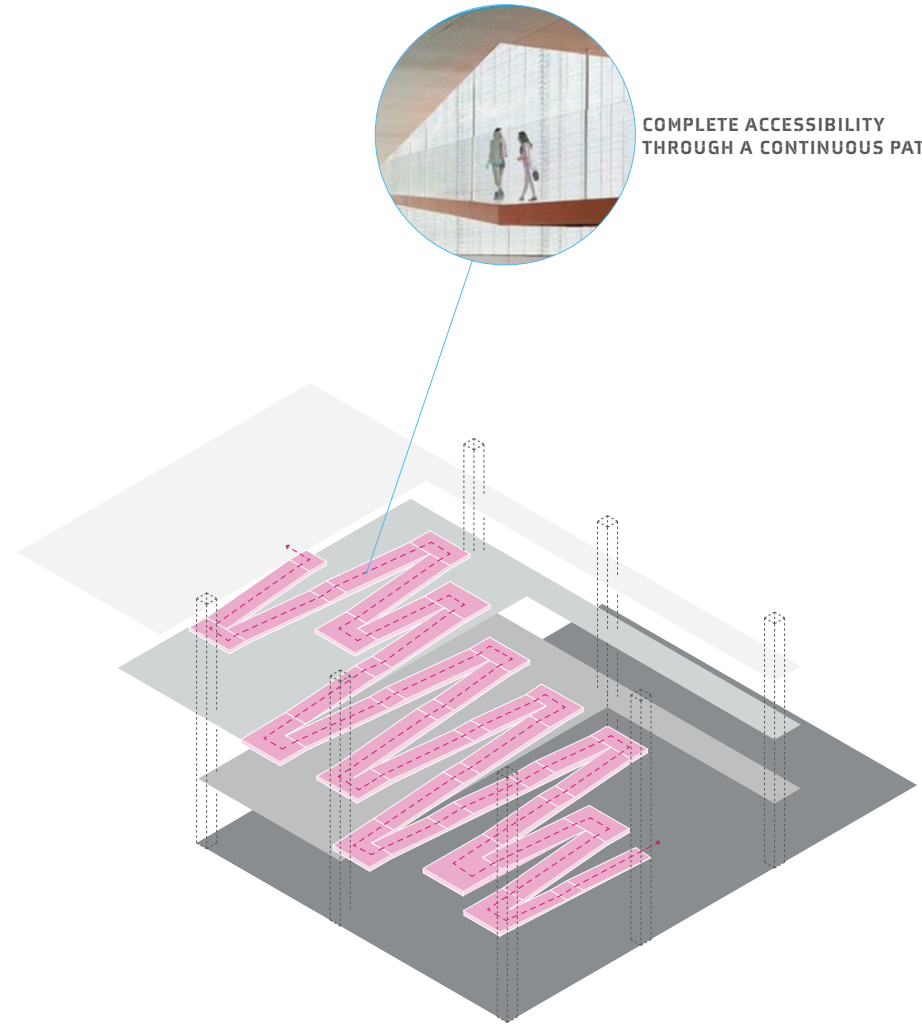

The larger landings become rooms, forming stepping stones along the path of knowledge. Rooms are spaces to gather and hold events. They are condensers where many topics and people can interact and cross-pollinate, and serve as engines of serendipity.

4.3

TARGET GROUP SPERSONAS

ALAN, STUDENT

Alan is a student and researcher in Music History and goes to the Library to read, study, meet with other researchers and find out new information about his field of research. He's used to technology and digital interaction.

JIM AND MARTHA, KIDS

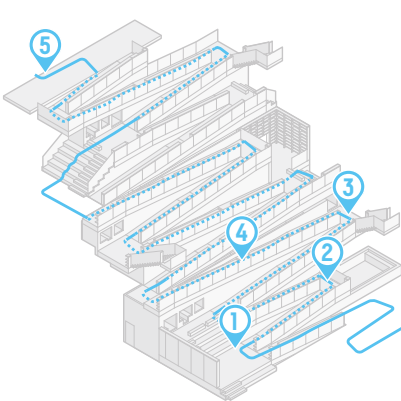

Jim and Martha go to the Library because it is a source of edutainment (education + entertainment): they can learn by having fun and there's always something to discover.

BILL, RETIRED

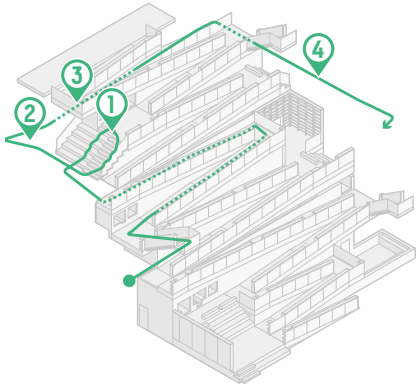

Bill goes to the Library to read the newspaper and to meet people. He's also interested in discovering new things about ancient history and geography. Sometimes he likes to take a nap while reading.

4.4
USER EXPERIENCE
FLOWS

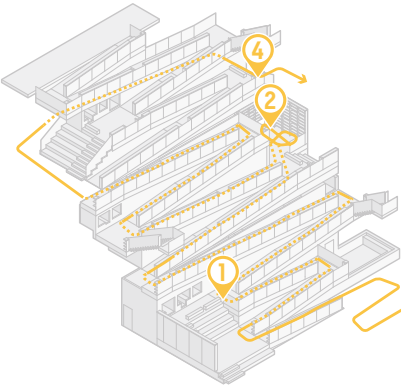

ALAN'S PATH OF KNOWLEDGE

- 1/ WAYFINDING
- 2/ BOOK SUGGESTION
- 3/ INFORMATION VISUALIZATION
- 4/ READING POCKET
- 5/ REAL TIME DASHBOARD

JIM AND MARTHA'S PATH OF KNOWLEDGE

- 1/ INTERACTIVE LEARNING
- 2/ PLAYING & READING AREA
- 3/ EVENTS & PUPPET SHOW
- 4/ BALCONY DESKS & SEATING

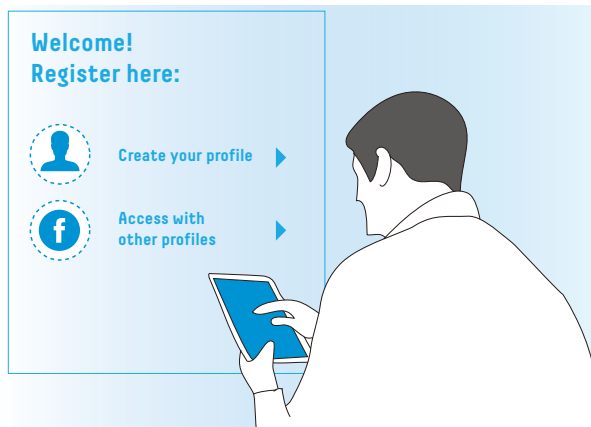

BILL'S PATH OF KNOWLEDGE

- 1/ STAMP COLLECTION
- 2/ RARE BOOKS EXHIBITION
- 3/ REST AREA & COMMUNITY MEETING
- 4/ NEWSPAPER READING

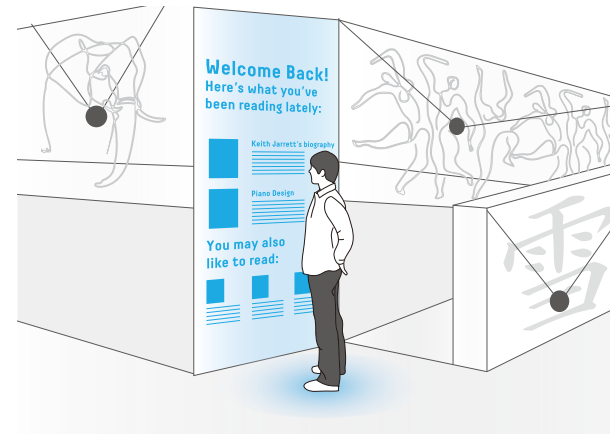

4.5

ALAN'S PATH OF KNOWLEDGE USER EXPERIENCE / STUDENT

1/ REGISTRATION - 1ST VISIT

During his first visit Alan decides to take part in the interactive Library and creates a personal profile on the system.

ALAN, STUDENT

2/ RECOGNITION (FROM THE 2ND VISIT)

On Alan's subsequent visits, the Library recognizes him and automatically sets his preferences on the Path of Knowledge.

3/ WAYFINDING

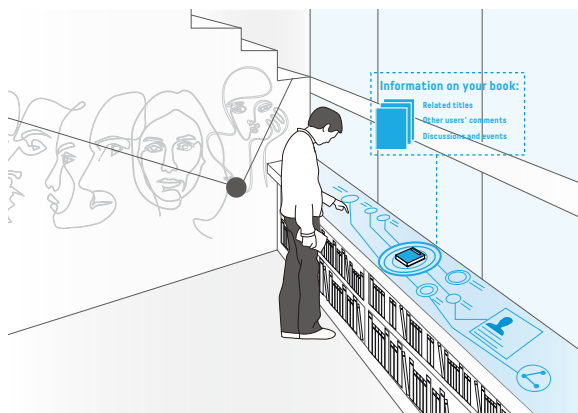

The journey along the path of knowledge becomes a treasure hunt: at each decision point there is an interactive map. Personalised signage is displayed for easy wayfinding.

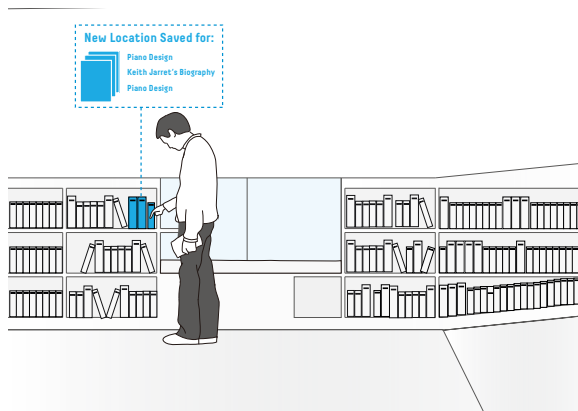

4/ BOOK SUGGESTION

The Library tracks Alan through the Path of Knowledge, and suggests titles based on his interests and reading history. The system records when he picks up or checks out a book, and automatically saves this information in his browsing history.

4.6

ALAN'S PATH OF KNOWLEDGE
USER EXPERIENCE / STUDENT5/ INFORMATION
VISUALIZATION

Each book has a "digital shadow" with information related to the topic, to previous readers and to related titles. This information can be visualized on interactive tables along the path. Alan can also share the book online or through social media, or leave a comment for future readers.

7/ RESHELVING & REAL TIME
ARCHIVING

The position of each book on the shelves is tracked and the Library Management System updates the catalogue in real-time. The user can replace their books anywhere on the path of knowledge creating a continuously evolving user-curated serendipity.

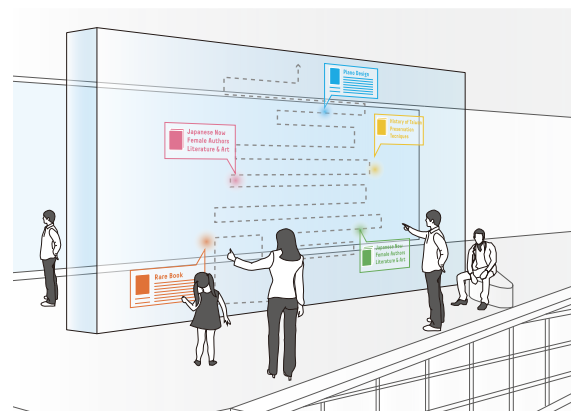

ALAN, STUDENT

6/ READING POCKETS

Alan stops in one of the pause points and niches along the path of knowledge for a quick consultation of the books he has found.

8/ REAL-TIME DASHBOARD

In the final destination it is possible to explore the Library's dynamics in real-time: where the users are and which books they are reading, or also how much energy is used & saved in comparison with other days, or what is the temperature at this moment on the terraces compared to street level.

4.7

JIM & MARTHA'S PATH OF KNOWLEDGE USER EXPERIENCE / KIDS

JIM AND MARTHA, KIDS

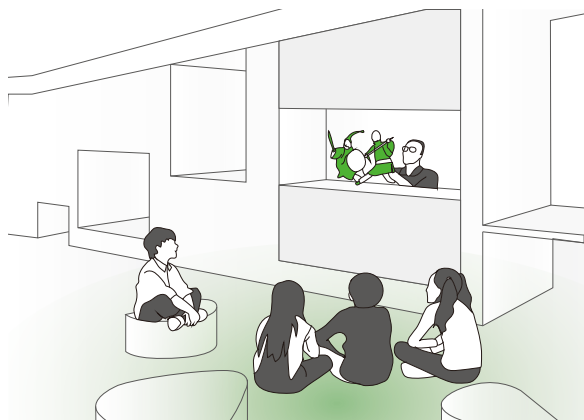

1/ INTERACTIVE LEARNING

The Path of Knowledge contains many opportunities for games and interactive learning, with many spaces designed specifically for kids. Spaces are informal, and encourage a playful interaction with information and learning.

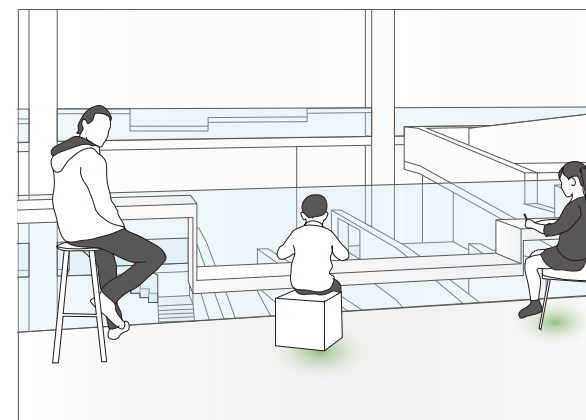

2/ INTERACTIVE GAMES, READING AREAS & KID STAMPS COLLECTION

In the play and reading area there are small niches for kids to explore with opportunities for interactive learning, and stamp stations to encourage exploration along the route.

3/ EVENTS & PUPPET SHOWS

The Rooms of Knowledge offer locations for small group activities such as discussions, workshops, reading clubs and puppet show. Flexible spaces encourage innovative uses, and the public location encourages spontaneous engagement.

4/ BALCONY DESKS & SEATING

The balconies are lined with desks and seating areas at different heights for adults and children.

4.8

BILL'S PATH OF KNOWLEDGE USER EXPERIENCE / RETIRED

BILL, RETIRED

1/ STAMP COLLECTION

Every turn in the ramp has a window and a display area for rare stamps to encourage users to progress up the ramp and make a new discovery around each corner.

2/ RARE BOOKS EXHIBITION

The exhibition area contains a variety of reconfigurable display cases for temporary exhibitions and display of items from the library archives.

3/ RESTING ALONG THE RAMP + MEETING COMMUNITY

At regular spaces along the ramp there are small comfortable rest areas to sit and read a book from the shelves, or meet with a friend and chat.

4/ NEWSPAPER READING + NAP

Larger spaces contain informal reading and rest areas tucked away from the main activity on the ramp. Users can sit and read the newspaper and observe the life of the library, or have a short nap.

書山 - 國家圖書館南部分館暨典藏中心

Path of knowledge - Southern Branch of the National Central Library

This approach invites visitors to engage with the collection in a more personalized way, encouraging exploration and serendipitous discoveries, fostering a dynamic and flexible interaction with knowledge where users can curate their own paths, leading to an evolving, interactive library environment.
